

THE POINTE
at MERIDIAN

CATIE System by Status Solutions

The Pointe at Meridian is excited once we open, to offer our independent residents, use of Status Solutions' cutting edge CATIE system.

CATIE (Communication and Access to Information Everywhere), was designed by Status Solutions to operate on an iPad, giving residents enhanced customer service and communication capabilities in their daily lives. Using these touchscreen tablets, The Pointe residents will be able to enjoy easy access to everyday information and services offered by our Community and staff — all at the touch of a button.

The new CATIE tablets will become a "smart hub" for those in the independent apartments and cottage homes, serving as a message center, electronic bulletin board and concierge.

This system will allow The Pointe residents to:

- Access Resident and Staff Directories and communicate via intercom.
- Email with friends and family using a unique email address. (optional)
- Receive photos and save them in a photo gallery.
- View dining menus and make reservations.
- Access event calendars and sign up for activities.
- Place housekeeping, maintenance, transportation and other service requests.
- Read monthly newsletters and other Community postings.
- Check the current weather future forecast.
- Be notified of safety and security alerts, including severe weather warnings or Community construction advisories.
- Check-in each morning with the push of a button, to let staff know you're feeling okay.
